

Graduate Engineer

With responsibility for the supply and reticulation of Natural Gas throughout Tasmania, Tas Gas Networks has quickly become one of the most recognisable and trusted names within the utilities market.

We're looking for expressions of interest from a Hobart-based Graduate Engineer to provide support to the Distribution Manager, including practical assessment of operational proposals, contract and project management, technical safety and regulatory compliance auditing and reporting.

In this role you will be responsible for:

- Assisting in the preparation of drawings for construction.
- Liaison with engineers and consultants regarding compliance issues.
- Review of other authority and Third Party proposals.
- Generation of correspondence regarding notification to referral authorities.
- Preparation of design risk assessments on metering installations and mains extensions.
- Assist with ensuring consistency in as-built drawings.
- Preparation, review and modification of engineering/technical standards and procedures.

To be successful in this role you will have:

- A Tertiary Degree in Civil or Mechanical Engineering.
- Demonstrated planning and design skills.
- Ability to prepare technical reports.
- Good communication and interpersonal skills.
- Proven ability to work well under pressure and show initiative.
- Advanced computer literacy in Microsoft Office packages including Word, Excel, and Outlook.
- Experience with Autocad.

This is an exciting opportunity for a person who enjoys a varied work day, takes responsibility and thrives in a busy environment. If further information is required, a Position Description can be obtained from Lisa McConnon at lisa.mcconnon@tasgas.com.au. Applications close 11 August 2010 and can be forwarded to Lisa McConnon.

As an employer, Tas Gas Networks is an established and growing organisation committed to providing an enjoyable and challenging work environment with competitive remuneration and a focus on ongoing personal development.
